-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lida et al (2002/0174511 A1), in view of Smick et al (5,490,336).

Lida et al disclose a blower (100) comprising a carrying frame (2) provided with a base plate (3), a fan (10) comprising a fan housing mounted on the carrying frame (2), wherein the fan housing has an intake opening that faces the base plate and is spaced from the base plate and wherein the intake gap is formed between the base plate and the fan housing (see paragraph 0027), an internal combustion engine (9) driving the fan (10) in order to take in working air through the intake opening (13) and to blow out the working air through a blower tube (43), and a filter member (24) located in the intake

gap (see paragraphs 0025-0032). Claims 1-11 differ from the disclosure of Lida et al in that there is a leaf shield covering the intake gap for preventing leaves or debris from entering the fan housing. Smick et al disclose an air intake filter for electric appliances (col. 1, lines 6-10) having a shield (92) covering the intake gap (78) for preventing particulates from entering the fan housing (80) wherein the shield is comprised of a foam material having coarse pores (see Abstract, see details of Fig. 4, col. 2, lines 12-25, col. 5, lines 34-50). It would have been obvious to a person having ordinary skill in the art at the time the invention was made to replace the filter member (24) of the blower assembly of Lida et al by a foam shield as taught by Smick et al since the foam shield provides the advantage of protecting appliances from damage by particulate foreign material (see motivation statement in col. 1, lines 27-29).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Minh-Chau T. Pham whose telephone number is (571) 272-1163. The examiner can normally be reached on Mon/Tues/Thur/Fri 7:00 am - 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Duane Smith can be reached on (571) 272-1166. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
